R2 **R2c**

FingerTec R2 empowers biological traits to enhance security in your daily life, as biometrics technology is a proof of real identity. Dubbed as FingerTec's bestselling terminal for access control, the R2 series is the ideal fingerprint system for those looking for security control with practicality. With the combination of R2 and R2c, both entrances and exits are controlled by secured biometrics keys, providing users with absolute comfort and value for money. FingerTec R2 series also offers the most commonly used communication protocols, and is equipped with an additional USB port for easy data transfer.

FingerTec R2 comes with the powerful software for easy data management and presentable reporting. On top of that, FingerTec R2 terminals run on a Linux platform, offering a more flexible operating system to cater to functions customization. Complimentary FingerTec BioBridge SDK is also available upon request for integration with third party software.

Variety of Verification
R2 contains not only fingerprint verification, but also provide other commonly used methods including cards, passwords, and their combinations.

Precise Identity Verification
R2 uses minutiae point matching fingerprint technology, an advanced algorithm to match the stored fingerprint template with the live one to guarantee authenticity.

Complete Access Solution
Install the slave, R2c with R2 to achieve a more secure full biometrics system for your in/out entry/exit door access system to block all unauthorized entries and exits.
Data Management Simplified
FingerTec R2 is equipped with TCP/IP connectivity and when that is not available, a USB flash port can be used to transfer transaction logs into your computer.

Manage Remote Data Easily
With Ingress, manage the data of all your remote doors easily, determine the settings of your access control system and get the details of all the access activities from one central location.
Short Message Display
Communicate with your employee by personalizing a short message to be displayed at the terminal when they verify. The message can be directed to an individual or to a group of staff.

Built In Alarm
R2 allows installation of external alarm to your access system to alert you during emergencies and break-ins. Secure your premise with GroupTimeZone and Group Verify functions.

Workcodes
Let your employee experience independence by reporting their whereabouts via R2 workcode function. Select a workcode listed and scan a finger to verify.
